

YASH GHOTEKAR

Software Developer Intern | Full Stack | MERN · Next.js · TypeScript

Pune, Maharashtra

☎ [+91-8459454322](tel:+91-8459454322) ✉ yash.22210210@viit.ac.in [in](#) [LinkedIn](#) [GitHub](#) [LeetCode](#)

SUMMARY

Full Stack Software Developer Intern with hands-on experience building scalable web applications using MERN Stack, Next.js, TypeScript, and RESTful APIs. Experienced in Agile workflows, code reviews, and cross-functional team collaboration. Solved 300+ DSA problems on LeetCode; passionate about writing clean, maintainable, high-performance code.

EDUCATION

Vishwakarma Institute of Information Technology, Pune

2022 – 2026

B.Tech – Electronics and Telecommunication – CGPA: 8.25

Pune, Maharashtra

Shree Mahaveer Jr. College

2021 – 2022

12th Grade – Percentage: 88.50%

Nashik, Maharashtra

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript, Python **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, Socket.IO, WebRTC **Databases:** MongoDB, MySQL

Tools & DevOps: Git, GitHub, Postman, Docker, Vercel, Jira, CI/CD, Agile/Scrum

Libraries: TanStack Query, Cloudinary, Gemini AI API **DSA:** LeetCode 300+ problems solved

EXPERIENCE

Software Developer Intern – Unique Schools India App LLP

Jan 2026 – Present

Next.js, TypeScript, Tailwind CSS, REST APIs

Pune, Maharashtra

- Built a scalable role-based ticketing platform managing 200+ tickets across 4 user roles (Client, Admin, Developer, Reviewer), cutting average ticket resolution time by 25%.
- Developed 20+ reusable UI components for ticket management, real-time chat, and file uploads – reducing feature development time by approximately 35% across new modules.
- Resolved 50+ bugs in authentication, session persistence, and UI consistency, improving overall platform stability and reducing user-reported issues by 40%.
- Participated in code reviews and maintained Git branching strategy in an Agile/Scrum environment with weekly sprint reviews and daily stand-ups.

Full Stack Developer Intern – TalesByDora

Jul 2025 – Dec 2025

MongoDB, Express.js, React.js, Node.js

Remote

- Built a responsive MERN travel platform handling end-to-end inquiry and lead management for 5+ travel packages, cutting manual follow-up time by 50%.
- Developed reusable React component templates for 7+ destination pages, reducing duplicate UI code by 30% and cutting page development time from 3 days to under 1 day.
- Integrated 15+ RESTful APIs connecting MongoDB, WhatsApp, and email services, automating lead capture and improving inquiry response rate by 60%.

PROJECTS

Connectify — Real-Time Communication Platform [↗](#) | MERN, Socket.IO, WebRTC, TanStack Query, JWT

- Built a production-ready real-time platform with instant messaging, video calling, typing indicators, and TURN server fallback supporting 100+ concurrent sessions.
- Optimized frontend with TanStack Query, optimistic UI updates, and modular component architecture – reducing unnecessary re-renders by an estimated 40%.
- Integrated Gemini AI API for real-time multilingual translation and AI-powered conversation summarization across 5+ supported languages.
- Designed a scalable Node.js + Express.js backend with JWT auth, MongoDB aggregation pipelines, and Cloudinary media management; deployed via Vercel with CI/CD integration.

Metro Route Optimizer [↗](#) | C++, Data Structures, Graph Algorithms, Dijkstra

- Developed a C++ metro route optimizer for a 50+ station network using Dijkstra's algorithm on weighted graphs with priority-queue traversal – $O((V+E) \log V)$ time complexity.
- Designed route recommendation logic factoring distance, travel time, fare estimation, and interchange minimization using clean OOP design with modular graph construction.

EXTRACURRICULAR

Associate Marketing Head, EDC VIIT (Sep 2023 – Jun 2024): Led student outreach campaigns and built “Laptop Bajar,” a WhatsApp-based peer laptop resale initiative coordinating cross-functional student teams.
