SUMMARY

Software Developer with internship experience building full-stack web applications using MERN Stack, Next.js, TypeScript, and RESTful APIs. Solved 300+ DSA problems and passionate about developing scalable, high-performance software solutions.

EDUCATION

Vishwakarma Institute of Information Technology, Pune

2022 – 2026

B.Tech – Electronics and Telecommunication – CGPA: 8.25

Pune, Maharashtra

Shree Mahaveer Jr. College

2021 – 2022

12th Grade – Percentage: 88.50%

Nashik, Maharashtra

P.T.V.K School

2019 – 2020

10th Grade – Percentage: 95.20%

Nashik, Maharashtra

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, TypeScript, Python
- **Databases:** MongoDB, MySQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3
- **Tools:** Git, GitHub, Postman, Docker, Vercel, Jira
- **Backend:** Node.js, Express.js, REST APIs, JWT
- **Core CS:** Data Structures and Algorithms, OOP, DBMS, OS, Computer Networks.

EXPERIENCE

SDE Intern – Unique Schools India App LLP

Jan 2026 – Present

Pune, Maharashtra

- Building a scalable role-based ticketing platform using Next.js, TypeScript, Tailwind CSS, and RESTful APIs managing 200+ tickets across 4 user roles.
- Engineered ticket management, chat, and file upload workflows for Client, Admin, Developer, and Reviewer roles.
- Built 20+ reusable UI components with route protection, form validation, and API error handling for improved maintainability.
- Resolved 50+ bugs in authentication, session persistence, file uploads, and UI consistency with backend and design teams.

Full Stack Developer Intern – TalesByDora

Jul 2025 – Dec 2025

Travel Startup

Remote

- Built a responsive MERN travel platform with optimized user workflows for end-to-end inquiry and lead management.
- Developed reusable React templates for 7+ destination pages, reducing duplicate UI code by 30%.
- Integrated 15+ RESTful APIs with MongoDB, WhatsApp, and email workflows for inquiry and lead tracking.

Technical Intern – 9 BRD, Indian Air Force

Jan 2025 – Jun 2025

Pune, Maharashtra

- Analyzed Python and LabVIEW-based automated PCB testing systems used in defense hardware maintenance workflows.
- Evaluated test workflows, LabVIEW configurations, and test data supporting validation of 20+ hardware components.

PROJECTS

Connectify — Real-Time Communication Platform 🗄️ | **MongoDB, Express.js, React.js, Node.js, JWT**

- Built a real-time communication platform using MERN, Socket.IO, and WebRTC with instant messaging, video calling, typing indicators, and TURN server fallback.
- Optimized frontend performance using React, TanStack Query, optimistic UI updates, API caching, reusable hooks, and modular component architecture.
- Integrated the Gemini AI for real-time multilingual translation and AI-powered conversation summarization.
- Developed a scalable Node.js, Express.js, and MongoDB backend with JWT authentication, MongoDB aggregation pipelines, and Cloudinary media management.

Metro Route Optimizer 🗺️ | **C++, Data Structures, Graph Algorithms**

- Developed a C++ metro route optimizer using weighted graphs, priority-queue traversal, and Dijkstra's algorithm.
- Designed route recommendation logic based on distance, travel time, fare estimation, and interchange minimization.
- Optimized pathfinding performance using priority-queue traversal for efficient route computation.

EXTRACURRICULAR & FREELANCE

Entrepreneurship Development Cell, VIIT, Pune

Sep 2023 – Jun 2024

Associate Marketing Head

Pune, India

- Led student outreach campaigns and developed "Laptop Bajar," a WhatsApp-based laptop resale initiative.
